

ABOUT US

Sylron Technologies is a dynamic innovative consulting company that provides solutions to small and medium-size business. We offer an extensive array of network solutions such as network planning, network design and implementation, computer hardware installation and support and web development.

We have methodically and purposefully built an IT outsourcing model based on a foundation of insightful strategic planning, disciplined project management, proactive computer services, and creative software development expertise. We offer innovative, value-driven network services programs providing measurable financial benefits for all businesses.

We build lasting business relationships by listening, adapting, and responding quickly to your changing business needs. We provide a wide range of expertise and knowledge, yet are consistent in project management and administration. Together we create value by crafting creative, dependable solutions reinforced by inspired customer care and service.
